

DEEP SEDATION CONSULTATION

Heartland Anesthesia & Consulting is providing intravenous deep sedation for you or your loved one's dental procedure. Because deep sedation provides a substantially reduced level of consciousness (but not unconsciousness or general anesthesia) a more thorough review of your health history is required by the Heartland Anesthesia Certified Registered Nurse Anesthetist (CRNA) prior to your procedure.

I, _____, give permission for Iowa Wisdom Teeth to disclose my health history to Heartland Anesthesia. The CRNA will review my medical history, make any appropriate recommendations for pre-operative testing, and discuss my health history with my managing physician if deemed necessary for my safety.
